

New Features for the PLUS C-12 Series CaptureBoards

Enhanced Security

To accommodate customers who desire to keep proprietary information from being accessed when the board is used in a common room or shared space, new security features have been added:

- A password to lock and prevent access to the board's settings
- A setting to block access to the board's internal data from a PC.
- A setting to disable the use of a USB memory stick.
- A setting to disable the ability to print from the internal memory.
- The **Erase Reminder** feature, which reminds the user to erase any writing & drawing which may have been inadvertently left on the scrolled surface of the board.

PDF, JPG and PNG Support

PDF and JPG formats have been added to the previously supported PNG format. Now users have more options for the easy handling of image files for the purpose of printing, saving to a USB memory stick and saving to a PC.

Header/Footer Function

This feature automatically adds company logos and identifiers to the printed or saved documents. Doing so helps keep meeting records organized and extends the utility of the documents.

Integrated "PLUS TOOLBOX" software

All of the settings and operations of the board can be easily accessed when using a connected PC. Simple "Plug&Play" recognition of the board means that the PLUS TOOLBOX menu automatically pops up on the PC screen when the PC and board are connected via a USB cable. This is an improvement from the previous software which required the settings to be adjusted model by model.

Color Laser Printer Compatible

In addition to being compatible with a number of InkJet printers, the C-12 Series can now be used with the magicolor 1600W and 1680MF from Konica Minolta. The compact size, high performance and low color printing cost of the magicolor 1600W and 1680MF make either of these laser printers a perfect match for your PLUS C-12 CaptureBoard.

Enhanced Screen Surface

While maintaining the aspects of a projection screen, improvements have been made to the board's writing/erasing performance.
